CASE
EMERGENCY SYSTEMS

***YOUR EMERGENCY
COMMUNICATION LIFELINE***

You know every minute counts in healthcare. It can literally be the difference between life and death. So, why leave reliable communications up to chance for patients, visitors, and staff at your location? With CASE Emergency Systems, you can ensure help is always available at the touch of a button, any time someone needs it.

CASE Emergency Blue Light Towers, E-Phones, and Lexan Call Boxes are ideal for a number of healthcare-related needs:

- » Parking lot events including falls, heart attacks, and public safety concerns
- » Drive-up ER help button for arrivals that are self-driven or dropped off
- » Dedicated phone in ICU, Radiology, or other spots without cell service
- » Relay communications between rooftop helipads and inside staff
- » Contact-free check in for waiting rooms and scheduled appointments
- » Pick up/Drop off button for prescriptions, lab samples, and reports
- » Public address system for hospital-wide announcements or warnings

How CASE Works

No matter which of our products you choose for your healthcare location, all CASE equipment offers the same functionality and benefits.

No Digging Trenches. No Complicated Installations.

CASE units are available 100% wireless with solar power panels, a 10-day back-up battery, and choice of 4G cellular or satellite phone connectivity. Hard-wired options are also available, but are not a requirement to install CASE equipment. CASE wireless equipment is actually so easy to install, we can walk your facility or property management team through it remotely.

Customized Connections.

You choose where users are routed when a CASE unit is activated. Units can dial 911, or can route to your front desk, intake staff, pharmacy, ER triage nurse on duty, on-site security teams, or anywhere else.

Durable in All Kinds of Weather

Stainless-steel housings and components are made to be weather and tamper resistant in rain, snow, heat, wind, and more.

High-Visibility

CASE units are easy for people to find thanks to a bright blue strobe, and a broad range of bold exterior colors. You can even choose to install additional strobes as necessary.

Additional Accessibility Options

To make sure your CASE units serve as many people as possible, you can add a TTY keypad and display and/or a faceplate camera to any product.

Public Address Capabilities

Adding an optional 4-way speaker allows you to activate any and all CASE units at your location to make announcements, warnings, or provide directions.

Self-Monitoring Maintenance

No need to engage maintenance teams in checking on CASE units — with the optional CASEAlert program, units perform scheduled self-checks and send reports to your central command team.

Upgrade Existing Call Boxes

If you're working with a legacy emergency calling system, it may be time to replace old lines or components. You may also simply want the added convenience and peace of mind that comes with solar power, a battery backup, and wireless connectivity. Our retrofit kits are designed to add any or all of these options to an existing call box, and are compatible with multiple different brands.
