

MILITARY INSTALLATIONS

CASE
EMERGENCY SYSTEMS

***SAFE, SECURE, SUPERIOR
EMERGENCY COMMUNICATIONS***

It's the nature of military operations to be separate from the general civilian communications grid. The extra level of security is necessary for preventing unwanted communications in and out of military facilities.

However, this can leave a gap in protection for those requiring emergency assistance - particularly in remote outposts or locations. With CASE Emergency Systems, you can ensure help is always available at the touch of a button, any time someone needs it.

CASE Emergency Blue Light Towers, E-Phones, and Lexan Call Boxes are ideal for a number of military-related needs:

- » Remote guard gate communications and/or check ins
- » "Safe" outside line for non-military personnel in strategic military campus locations
- » Dedicated phone remote outposts and stations without cell service
- » Checkpoint or emergency helplines along military-controlled trails and/or roadways
- » Relay phones between main offices and fleet operations, hangars, ports, or other facilities
- » Public address system for base announcements or warnings

How CASE Works

No matter which of our products you choose for your location, all CASE equipment offers the same functionality and benefits.

Ephone

Lexan Call Box

Retrofit Kit

Blue Light Tower

No Digging Trenches. No Complicated Installations.

CASE units are available 100% wireless with solar power panels, a 10-day back-up battery, and choice of 4G cellular or satellite phone connectivity. Hard-wired options are also available, but are not a requirement to install CASE equipment.

CASE wireless equipment is actually so easy to install, we can walk your dreams through self-installation.

Customized Connections.

You choose where users are routed when a CASE unit is activated. Units can dial 911, or can route to MPs, guard staff, on-site security teams, or anywhere else.

Durable in All Kinds of Weather

Stainless-steel housings and components are made to be weather and tamper resistant in rain, snow, heat, wind, and more.

High-Visibility

CASE units are easy for people to find thanks to a bright blue strobe, and a broad range of bold exterior colors. You can even choose to install additional strobes as necessary.

Additional Accessibility Options

To make sure your CASE units serve as many people as possible, you can add a TTY keypad and display and/or a faceplate camera to any product.

Public Address Capabilities

Adding an optional 4-way speaker allows you to activate any and all CASE units at your location to make announcements, warnings, or provide directions.

Self-Monitoring Maintenance

No need to engage maintenance teams in checking on CASE units — with the optional CASEAlert program, units perform scheduled self-checks and send reports to your central command team.

Upgrade Existing Call Boxes

If you're working with a legacy emergency calling system, it may be time to replace old lines or components. You may also simply want the added convenience and peace of mind that comes with solar power, a battery backup, and wireless connectivity. Our retrofit kits are designed to add any or all of these options to an existing call box, and are compatible with multiple different brands.

On the CASE for for America's Armed Forces

We are proud to be a U.S. based company, with equipment that is made in the USA. Our work in the emergency communications field is vast, and we stand behind our quality
