

Description

Engineered to be a robust, completely wireless solution, the Blue Light Tower is ideal for enhancing public security on college campuses, parking lots and transit stations by providing clear voice-to-voice communication over a cellular network.

Key Features

- › Available in AC or Solar with battery back-up to provide uninterrupted power.
- › Verizon® and AT&T® network certified voice module
- › Weather-proof, tamper-proof steel housing protects the system's electronics insuring reliability and safety to the caller when needed
- › Highly visible blue LED light positioned on top of the tower and faceplate illuminates for the duration of the call.
- › Call location identifier
- › ADA-compliant
- › Includes CASE's exclusive, self-diagnostic, alarm monitoring system called CASE Alert®. The program provides system owners daily email reports on the operational status of their system.

Additional Features

- › Mass Notification System
- › Faceplate Camera

Blue Light Tower

Product Sheet

Part Number: Verizon C100 Tower CB - 6000-0351-05
ATT G100 Tower CB - 6000-0351-07

Dimensions

Height: 11' 8" (to top of antenna)
9' (to top of housing)
Width: 10.5"
Depth: 8"
Weight: 208 lbs with battery

Battery (Standard)

Voltage: 12 V
Capacity: 40 Ah
Weight: 32 lbs

Solar Panel (Standard)

Power (Max): 45 W
Voltage (Max Power): 18.3 V
Current (Max Power): 2.52 A
Weight: 24.7 lbs

AC

Voltage: 110 V or 220 V
